Humbrol products are recommended by Airfix for use with their plastic model kits.

Buying a model kit is only the start of a pastime enjoyed by millions the world over.

Generations of modellers, from beginner to experienced professional, have turned to Humbrol products to help them construct and decorate their models to make them works to be proud of.

Humbrol have been producing paints, adhesives and other products for over 90 years and as well as the famous Enamel product in the iconic Humbrol tinlet, the range includes glues, varnishes, brushes and other products to enable you to get the best results out of your modelling experience.

Tamiya conversion table with columns for Humbrol and Tamiya paint numbers.

Testor conversion table with columns for Humbrol and Testor paint numbers.

US Federal Standard conversion table with columns for Humbrol and US Federal Standard paint numbers.

# useful hints and tips

- Gluing: It can be useful to do a 'dry run' - fitting the parts together without glue to ensure you get it right when it comes to applying your glue.
Painting and Varnishing: Parts are best painted before being glued together. Always scrape any paint from the surfaces to be glued to ensure a good bond - glue's effectiveness is much reduced on a painted surface.
Decals: Cut the decals out very carefully, keeping as near to the edge of the design as possible. Immerse in Decalfix for about 45 seconds or until softened.

# other Humbrol modelling products

Main product table with columns: Product, Usage, Substrate, Application, Drying Time, Coverage, How To Clean. Includes sections for Paint, Glues, and Application.

These are some useful things to bear in mind to ensure you get the best results with Humbrol
